Being an over the road truck driver, it is imperative I know traffic and weather conditions for the cities I enter before I enter them. I cannot always receive weather and traffic conditions in a timely manner on local broadcast. I'm not able to spend the time listening to commercial broadcasts. I'm not interested in advertisements. I just want to know whether or not I should take Route A to B, or Route C to D. I pay for XM Radio so that I can have the convenience of listening to instant weather and traffic. I respectfully request the FCC to reject the NAB's petition #04-160. Satellite radio provides variety and quality not available elsewhere. I chose to pay for this service and it should not be up to the NAB to dictate what I am permitted to hear. Bill Trusty
